EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 15-19 are renumbered 14-18, respectively.

The following is an examiner's statement of reasons for allowance: Applicants' 2. remarks and amendment, filed 16 May 2005, are persuasive in overcoming the rejections previously set forth. Removal of the recitation of "non-deformingly" from the claims overcomes the rejection of the claims under 35 U.S.C. 112, first paragraph, and the additional limitation wherein the protrusion has a flat upper surface and a smooth end surface is considered sufficient in overcoming the rejections under 35 U.S.C 103(a). While the reference of JP 10-15661 (cited previously) demonstrates that it is already known in the art to provide a base member with a radially extending protrusion, specifically for the purpose of creating a channel to accept a brazing material therein, the reference fails to teach providing a protrusion having a flat upper surface and a smooth end surface. In contrast, the reference teaches the use of protrusions having a pointed profile that are subsequently bent into position. Furthermore, Applicants have disclosed a number of significant advantages that the claimed flat upper surface and smooth end surface provide when used in the claimed heat transfer member for a reciprocating device, which sufficiently demonstrates that such a configuration is not

simply a matter of design choice. A further search of the prior art did not reveal any clear teaching or strong suggestion of Applicants' claimed heat transfer member, accordingly the claims are considered allowable.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard L. Leung whose telephone number is 571-272-4811. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl J. Tyler can be reached on 571-272-4834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
